A FAIRFIELD AND NO FAVOR

HERBERT SPENCER'S PHILOS-  
OPHY FURTHER DISCUSSED.

"OUTSIDER" RETURNS TO THE CHARGE  
--SPENCER'S THEORIES NOT IN AC-  
CORD WITH MATHEMATICAL TRUTH  
--SCIENCE AND RELIGION.

A new interest is imparted to the discussion of the synthetic philosophy of Herbert Spencer to-day by a stirring contribution from "Outsider," whose first article, published in THE TIMES of March 23, was the provoking cause of the controversy which has since been carried on in our columns. We print, also, other contributions taking up the scientific, philosophical, and theological aspects of Spencer's philosophy, and a considerable number of contributions stand over until next week.
