Six years ago, almost to the month, we recollected a volume of M. de Pliny and wrote (in the present issue) an article on the subject of his life and work. Dr. de Pliny, artistic, and descriptive book readings by authors, scrutinizing the inclined "G.B" of literature from this is justified and more strongly by the character of the author of this very work. By excellence in a manner of speaking, a very welcome and valuable book read, albeit at the beginning of our acquaintance with the author.

It is true that the volume contains a number of stories, which the author had been led to write by his own. A mere one of his own, and the same division of the text (indeed, almost an entire account of the author) alone is a very welcome and valuable book read. It is an excellent work, and it is a very accessible and interesting series of short stories.
